

## E-RATE CONNECTIVITY SOLUTIONS

# Fuel All the Apps, Devices and Innovations You Need to Succeed.

Technology is at the core of today's learning landscape. **Sticker shock shouldn't get in the way of student success.**

### A more affordable way to connect the classroom.

Technology is essential for education in the post-pandemic era, spanning from classrooms to counseling offices and the virtual world. Today's learning depends heavily on technology.

A wide range of ed-tech tools and applications enable the "whenever, wherever" classroom. However, keeping up with the rapidly evolving educational landscape is challenging. Limited resources and tight budgets pressure district IT staff to achieve more with less. Many schools and libraries face a tough choice between making do with existing resources or investing in new technologies at the expense of other initiatives.

Schools and libraries have a partner to help design effective educational networks with Segra.

### Connecting schools. Supporting students.

High costs make it harder to close the gap between the digital "haves" and "have-nots". That doesn't have to be the case. E-Rate eligible schools and libraries can harness the power of Segra solutions to empower students and deliver educational equity without breaking bank.

- Internet: Modern education demands massive data handling. Segra provides a reliable channel for high-speed, high-volume traffic.
- Fiber-based Dedicated Internet: Keeps staff and students connected on a secure network with guaranteed bandwidth up to 100 Gbps and symmetrical speeds for seamless communication.
- Segra Ethernet WAN unites the locations and offices in your district on a single network that keeps sensitive information hidden from prying eyes and delivers a reliable connection from end to end via switched or routed configurations.

Segra is proud to be an E-Rate service provider, committed to supporting student success with a proven track record of delivering effective connectivity solutions for schools.

## Education Solutions

From cybersecurity to compliance and regulation to customer service, there are lots of priorities that education institutions can't afford to ignore. Knowing the challenges and pressures facing the industry, Segra has a winning roster of cybersecurity, connectivity, voice, colocation and cloud services including:

Internet

Ethernet Access

Dark Fiber

Wavelengths

SD-WAN

DDoS Protection

Voice

Let's Create Winning Connections Together.
