

Ethernet Access

Secure, Reliable Access Tailored to Suit Your Needs

The control and flexibility you need to build and grow an enterprise-grade private network at a great value

Seamless connectivity, scalability, flexibility and reliability

Complex network configuration management can overwhelm IT resources. Enterprise growth and technological changes strain network infrastructure and call for a carrier-grade solution.

Segra Ethernet Access service gives you design flexibility to tailor your network, scalable bandwidth to support growing demands and the resiliency and quality of service to maintain operations under the most challenging circumstances. As a transparent Layer 2 service, it integrates with existing infrastructure for simplified management without sacrificing control.

More than just a scalable, enterprise-grade private network ...

- Flexible topology options support point-to-point, point-to-multipoint and multipoint-to-multipoint configurations.
- Baked-in resiliency mechanisms to ensure important data flows even if traffic spikes create congestion.
- Scalable bandwidth speeds from 10 Mbps up to 100 Gbps.

Why Segra

At Segra, we understand that winning in today's business landscape requires more than just technology — it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team — from sales to network engineering to customer support — are all living and working in the communities they serve.

Specifications

Available 1 Gbps, 10 Gbps and 100 Gbps port speeds

Supports E-LINE, E-LAN and E-TREE topology configurations

Built-in redundancy mechanisms ensure consistent data flow across the network

Let's Create Winning Connections Together.
