

Connected Healthcare is Effective Healthcare

Elevating the Delivery of Care Starts With a Better IT Foundation

Quality patient outcomes start with quality IT. With so much riding on the line, settling for less isn't worth the risk.

The foundation of patient-focused, digital-first medicine

Telehealth, electronic health records (EHRs) and the Internet of Medical Things (IoMT) aren't just tools – they're bridges to better care. Innovations that seemed like science fiction only a few years ago are actively raising the standard of care and empowering providers to do more for their patients through the power of next-gen technology, starting with the IT framework that makes it possible.

Segra provides healthcare organizations of all sizes and specialties with the IT and networking solutions, resources and support needed to protect patient data, streamline operations and deliver more equitable, patient-centered care.

More than internet ...

- Dedicated high-speed fiber supports real-time communication and collaboration with symmetrical speeds up to 100 Gbps.
- Guaranteed bandwidth ensures large medical imaging files and electronic health records can be sent and received without data loss or disruption in transit.
- Robust firewall and active anti-DDoS defenses safeguard critical systems and information from the threat of cyberattacks.
- Flexible multi-site connectivity and streamlined network management enable secure, consistent performance across on-campus buildings and between distributed clinic locations.

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

Winning Solutions That Get You More
