

Connectivity for Large Enterprise

Building the Foundation for Global Operations and **Innovation**

Technology is no longer just a business enabler—it's a critical differentiator in today's competitive landscape. Meeting the demands of distributed operations, supporting productive hybrid work, and driving digital transformation requires a robust, secure, scalable connectivity foundation.

Helping enterprises stay agile and competitive in a dynamic market.

Cloud adoption, AI implementation, data-driven operations, IoT devices, and flexible work models ... digital transformation touches every corner of modern enterprises. While organizations have made significant investments in modernizing their technology stack, reliable, high-performance connectivity remains crucial for realizing these investments' full potential.

This expanded digital footprint demands scalability and vigilance. Enterprises must balance rapid innovation and deployment with stringent security requirements and regulatory compliance. Segra provides large enterprises with high-performance connectivity solutions to build and maintain a robust technology foundation that enables growth, innovation, and operational excellence.

More than just enterprise-grade internet ...

- Reliable, resilient fiber internet maintains your operations and keeps your workforce connected, even under adverse circumstances
- Wavelength services delivering dedicated connections with speeds up to 400 Gbps for maximum throughput and consistent, reliable performance
- Dark fiber solutions provide full control over network infrastructure and unlimited scalability
- Secure, high-speed direct connections to major cloud service providers
- DDoS protection and advanced security services to shield your operations from evolving threats
- SD-WAN solutions for intelligent traffic management and optimal application performance
- Hosted voice enabling seamless collaboration across your distributed workforce

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

Winning Solutions That Get You More
