SEGRA

Metro Ethernet

E-LINE (Point-to-Point)

Delivered over Segra's carrier-grade, 100% fiber-optic network

Seamless connectivity. Enhanced scalability. Incredible flexibility. Proven reliability.

E-LINE is a private and dedicated Layer 2 point-to-point data service that interconnects and delivers Ethernet transport between two locations.

E-LINE is ideal for customers looking for a secure, dedicated, and flexible solution for connecting two key locations.

With a high-speed Ethernet connection, your business can experience unsurpassed performance and reliability for your mission-critical data applications.

More than just a scalable, enterprise-grade private network...

- 100% fiber-optic infrastructure
- Individually custom designed circuits to meet specific requirements
- Dedicated and symmetrical bandwidth
- Access ring protection and route diversity options
- Carrier-grade equipment deployed at a customer's physical location
- Connection options range from 10 Mbps to 20 Gbps

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

Specifications

- **Point-to-Point Connectivity:** Reliable, dedicated connections between two locations.
- **Low Latency:** Ideal for real-time applications requiring minimal delay.
- **Scalability:** Easily expand bandwidth as your business grows.

Create Winning Connections Together.
