

Dark Fiber

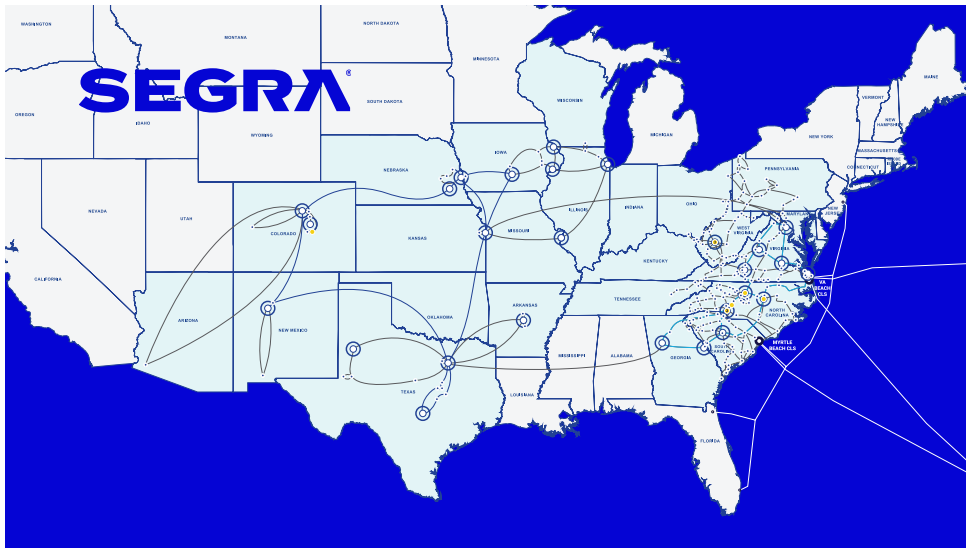

End-to-End Connectivity Control.

Organizations evolve and bandwidth demands change. Building and managing your own connectivity with dark fiber provides the ultimate control and flexibility.

Putting you in the driver's seat of your network.

Next-generation technologies are accelerating competition for bandwidth. Meeting the demand requires greater route diversity, higher capacity and the ability to quickly deploy new connections.

Segra Dark Fiber provides fiber-optic infrastructure that can be managed and tailored as if it were your own to meet specific customer needs from equipment selection and deployment to networking monitoring and performance management.

Segra Dark Fiber highlights

- Best-in-class fiber infrastructure
- Metro and long-haul availability across the entire Segra footprint
- Fiber network access in 24 States and 26 markets
- Supports carrier-managed connectivity solutions

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

Why Segra Dark Fiber

Performance and Resiliency
Choose and build on your ideal routes from our dense fiber infrastructure.

Scalability and Security
Private, 100% dedicated network infrastructure lets you add capacity to meet customer demands.

Flexibility and Control
Select, deploy and manage the best equipment for your network.

Let's Create Winning Connections Together.
