

Connecting Communities of **Faith**

Digital Innovation Can Help Spread Your Message Far and Wide and **Better Serve Your Communities** where they are able to engage.

Your ministry is built on connection. Future-ready IT can help expand that impact into the community and around the world.

Coming together in belief is easier with technology

From live-streamed sermons to online prayer groups to immersive multi-media worship experiences to digitalized ministry tools, technology is transforming how religious communities connect with each other and the world.

Segra helps religious organizations and faith groups do more for the communities they serve with future-ready IT and connectivity solutions that deliver the performance, security and reliability they need to share their beliefs.

More than just internet ...

- Dedicated fiber access keeps your staff and volunteers connected with speeds up to 100 Gbps.
- Multi-site connectivity unites satellite ministry locations on a single secure network with cost-effective, reliable performance and control.
- DDoS protection and robust cybersecurity keep your internet up when bad actors target your web presence.
- High-quality voice and collaboration support open, clear communications between staff, volunteers and members.

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.
