SEGRA®

Wireless LTE

Get a Reliable, Secure Connection That Works Where and When You Need It To.

Connecting remote locations with Dedicated Internet Access and a failover broadband path isn't always practical or possible. Wireless LTE ensures your remote and hard-to-reach sites have a reliable, secure connection that will remain operational under any circumstances.

Connectivity that keeps your remote locations running no matter what.

Sufficient connectivity isn't always available in all your locations. Unseen disruptions are an ever-present threat to your business's operational resilience that can appear whether you're prepared or not. Working without a backup plan to keep you up and running could be costly.

Segra Wireless LTE provides flexibility and reliability for both primary and secondary scenarios, with fast-deployment capabilities that ensure you have connectivity where and when you need it.

Business-grade Wireless LTE with benefits

- Multi-carrier compatibility allows you to use different providers for primary and secondary connectivity.

- Automatic failover switching keeps your traffic flowing without disruption.

- Your data and systems are protected by a private wireless connection to our fiber-based network.

- 24/7 monitoring and management by Segra Network Operations Center ensures consistent performance around the clock.

- Carrier agnostic — choose the right provider(s) according to your needs and service availability.

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology — it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

Specifications

Available across all 24 States and major markets on the Segra fiber footprint

Carrier selection must be made prior to installation

Let's Create Winning Connections Together.
