EdgeLync

An Advanced Internet Connectivity Backup Solution That Works When You Need It Most.

Network disruptions pose a constant threat to your business's operational resilience, often striking unexpectedly. EdgeLync offers Segra customers an automatic failover solution, ensuring reliable and secure 5G* connectivity that remains operational under any circumstance.

Connectivity that keeps your business running no matter what.

Businesses depend on internet connectivity to drive operations forward, and lacking a backup plan can be costly. EdgeLync provides flexibility and reliability for both backup and primary connectivity implementations, with swift deployment capabilities ensuring you have connectivity where and when you need it.

Business-grade wireless connectivity with benefits.

- All major carriers are available for Active-Passive Dual SIM functionality.

- Automatic failover and failback switching ensures uninterrupted traffic flow.

- Built-in 8-hour battery backup maintains operations during power outages.

- 5G* connectivity where available, with 4G LTE as a fallback where 5G coverage is not available.

- No data overage fees, offering an affordable straightforward pricing structure.

- 24/7/365 monitoring and management by Segra Network Operations Center ensures consistent performance.

- Carrier agnostic — choose the right provider(s) according to your needs and service availability.

5G availability, coverage, and performance vary by area, network conditions, and device capabilities are subject to availability. Wireless LTE (4G) device available where 5G access is not available.

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology — it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

Specifications

Available across Segra's business-only fiber network

Carrier selection must be made prior to installation to ensure seamless setup and operation.

Supports voice, data, and internet traffic, providing a comprehensive solution.

Address validation will be conducted ahead of 5G deployments, applicable in primary instances only, to confirm service feasibility and reliability.

Let's Create Winning Connections Together.
