SEGRA®

Advanced Connectivity for **Government**

Effective Leadership and Reliable IT Build a Strong Government

Serving the needs of citizens and maintaining efficient government services require more than legacy systems can deliver.

Better connectivity for better government

Citizens have high expectations of their officials, including clear and transparent communication, dependable access to essential services, economic development, public safety, and social equity. Meeting those demands often collides with budgetary restraints and finite resources. As governments strive to modernize their infrastructure, they must also navigate complex regulatory requirements and maintain resilient, accessible networks for all citizens.

Segra helps governments do more for the people they serve with future-ready IT and connectivity solutions that offer the performance, security, and reliability needed to satisfy the needs of their citizens now and in the future. Our scalable solutions support evolving demands, enabling government agencies to deploy innovative services and connect more effectively with their communities.

More than just internet ...

- High-speed connectivity ensures a smooth flow of data between departments and locations with symmetrical speeds up to 100Gbps.
- Multi-site connectivity unites distributed locations on a single secure network with cost-effective, reliable performance and control.
- Segra's dark fiber service gives you full operational control and ownership of a dedicated, private, and secure network with virtually unlimited bandwidth.
- SD-WAN simplifies your ability to unite multiple locations on the same network for greater control, performance and cost savings.
- EdgeLync offers a flexible and cost-effective way to support your network infrastructure, whether as a high-speed backup or as a primary connection for remote locations.
- Protect your network and data with advanced threat detection and intelligent defense solutions.
- Segra voice solutions empower yourorganization with a comprehensive suite of calling and collaboration tools.

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.
