

Connected Healthcare is Effective Healthcare

Elevating the Delivery of Care Starts With a Better IT Foundation

Quality patient outcomes start with quality IT. With so much riding on the line, settling for less isn't worth the risk.

The foundation of patient-focused, digital-first medicine

Telehealth, electronic health records (EHRs) and the Internet of Medical Things (IoMT) aren't just tools – they're bridges to better care. Innovations that seemed like science fiction only a few years ago are actively raising the standard of care and empowering providers to do more for their patients through the power of next-gen technology, starting with the IT framework that makes it possible.

Segra provides healthcare organizations of all sizes and specialties with the IT and networking solutions, resources and support needed to protect patient data, streamline operations and deliver more equitable, patient-centered care.

More than internet ...

- Internet with guaranteed bandwidth and symmetrical speeds ensure seamless data transfer.
- Ethernet offers streamlined network management and flexible private infrastructure to provide consistent performance and enhanced reliability, even under heavy demand.
- Segra's dark fiber service gives you full operational control and ownership of a dedicated, private, and secure network with virtually unlimited bandwidth.
- For large hospital networks with multiple campuses, data centers, or facilities requiring high-capacity interconnection, wavelengths deliver dedicated circuits with speeds from 10 Gbps to 400 Gbps.
- SD-WAN simplifies your ability to unite multiple locations on the same network for greater control, performance and cost savings.
- EdgeLync offers Segra customers an automatic failover solution, ensuring reliable and secure connectivity that remains operational under any circumstance.
- Express Cloud Connect allows you to connect directly to leading cloud providers through dedicated, high performance pathways that securely host and run clinical data and health records remotely.
- Robust firewall and active anti-DDoS defenses safeguard critical systems and information.
- Reliable voice and video quality are essential for secure telehealth appointments, efficient communication with your care team, and timely patient coordination.

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

Winning Solutions That Get You More

	Internet
	Ethernet Access
	Dark Fiber
	Wavelengths
	SD-WAN
	EdgeLync
	Express Cloud Connect
	Cybersecurity
	Voice

Let's Create Winning Connections Together.
