

Connectivity for the Hospitality Industry

Exceeding Guest Expectations Starts With IT that Goes Above Yours.

Quality experiences start with quality service. That includes the network and internet solutions that help your staff delight guests and keep every aspect of your operations running smoothly.

Better hospitality starts with better connectivity

“Good enough” isn’t good enough any more. Hospitality brands win or lose based on their ability to deliver outstanding guest experiences. That means more personalized service, digital self-service touchpoints, increased leverage of mobile apps and more of the tech-driven amenities we rely on for work and leisure.

It also means there are more IT challenges to navigate.

Segra provides hospitality groups of all sizes and specialties with business-grade connectivity and networking solutions to go above and beyond in all areas, from guest services to cybersecurity to operational efficiency and resilience.

More Than Just Internet ...

- High-speed fiber internet supports your operations and keeps your staff connected with symmetrical speeds up to 100 Gbps.
- Ethernet delivers dedicated, high-bandwidth connectivity for consistent performance and secure data transfer between locations.
- SD-WAN simplifies your ability to unite multiple locations on the same network for greater control, performance and cost savings.
- EdgeLync offers a flexible and cost-effective way to support your network infrastructure, whether as a high-speed backup or as a primary connection for remote locations.
- Rock-solid network defenses and dedicated connectivity ensure sensitive business and customer data is safely protected from the threat of cyberattacks.
- High-quality voice, video and conferencing solutions deliver crisp, clear quality for all your communication needs.

Why Segra?

At Segra, we understand that winning in today’s business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

Winning Solutions That Get You More

	Internet
	Ethernet Access
	SD-WAN
