

Connectivity for Large Enterprise

Building the Foundation for Global Operations and Innovation

Technology is no longer just a business enabler—it's a critical differentiator in today's competitive landscape. Meeting the demands of distributed operations, supporting productive hybrid work, and driving digital transformation requires a robust, secure, scalable connectivity foundation.

Helping enterprises stay agile and competitive in a dynamic market.

The adoption of cloud technologies, implementation of AI, data-driven operations, IoT devices, and flexible work models all illustrate the need for improved compute with complimenting high capacity fiber. This expanded digital footprint demands scalability and vigilance.

Enterprises must balance rapid innovation and deployment with stringent security requirements and regulatory compliance. Segra provides large enterprises with high-performance connectivity solutions to build and maintain a robust technology foundation that enables growth, innovation, and operational excellence.

More than just enterprise-grade internet ...

- Dependable and robust fiber internet ensures your operations run smoothly and keeps your workforce connected, even in challenging conditions.
- Ethernet delivers dedicated, high-bandwidth connectivity for consistent performance and secure data transfer between locations.
- Dark fiber solutions provide full control over network infrastructure and unlimited scalability.
- Wavelength services delivering dedicated connections with speeds up to 400 Gbps for maximum throughput and consistent, reliable performance.
- SD-WAN offers intelligent traffic management and optimal application performance.
- EdgeLync offers a flexible and cost-effective way to support your network infrastructure, whether as a high-speed backup or as a primary connection for remote locations.
- Protect your network and data with advanced threat detection and intelligent defense solutions.
- Segra voice empowers your business with a comprehensive suite of calling and collaboration tools.
- Express Cloud Connect provides secure, high-speed direct connections to major cloud service providers.
- Use colocation services to house critical IT infrastructure in secure, high-performance data centers.

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

Winning Solutions That Get You More

Connectivity

Internet • Ethernet • Dark Fiber • Wavelengths • SD-WAN • EdgeLync

Cybersecurity

Firewall • DDoS Protection
