

SkyVoice

SkyVoice combines a feature-rich business phone system with video conferencing, chat, contact center, file sharing, texting and more, with integrated mobile and desktop apps that allow for wherever, whenever communication. With the needs of business in mind, SkyVoice's scalable, efficient, cost-effective cloud solution uses the latest technology and has the flexibility to expand as technology changes and your business grows.

With SkyVoice, the possibilities are endless with advantages that far outweigh conventional phone systems. SkyVoice gives you the tools to stay responsive, competitive and ready to make an impact.

Customer Benefits

Performance

Ultra-fast fiber speeds take your business communications to a whole new level. Having your most business-critical solution on our fiber network provides you with peace of mind and a quality experience for your employees and customers.

Increased Productivity & Collaboration

Communicate and work from virtually anywhere, at any time with integrated mobile and desktop apps.

Cost-Efficient

Save on operating expenses, equipment and maintenance costs, and long-distance charges.

Highly Secure

Protects users and their data from any potential cyberthreats with secure datacenters, a certified security team, encryption, password management, and two-factor authentication.

Compliant

Our services are designed to meet industry-specific privacy and security requirements with compliant data encryption and retention.

Scalable

Future-proof your business with a cloud solution that scales effortlessly as your business grows and evolves. Easily add/move users, transfer licenses, and meet differing needs across locations.

Innovation-Driven

SkyVoice is continually evolving to address modern business challenges, ensuring you always have access to the latest and best technology.
