

Backup as a Service (BaaS)

Secure Backup and Recovery for Your Critical Business Data

Modern operations demand uninterrupted access to files, applications, and customer records. Protect essential systems with secure, multi-site recovery infrastructure.

Is your continuity plan tested for unexpected downtime?

Regardless of company size, protecting critical records dictates business survival. Unplanned outages, human error, and ransomware put vital operations at risk. Segra Backup as a Service provides fast, validated recovery for virtual machines, physical servers, and application-aware environments including Active Directory, Oracle, and SQL databases. Dedicated Segra Systems Engineers manage your environment directly from company-owned data centers, ensuring your recovery objectives remain the top priority.

Core Capabilities and Advantages

- **High Availability:** Engineered with Commvault to deliver enterprise-grade backup, rapid restoration, and policy management.
- **Scalable Capacity:** Flexible monthly consumption aligns directly with business growth without requiring upfront hardware investments.
- **Defensive Security:** Data remains isolated and encrypted both in transit and at rest, with optional immutable air-gapped storage to stop ransomware.
- **Multi-Site Redundancy:** Seamlessly replicate backup data across separate Segra data centers for built-in geographic resilience.

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology — it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team — from sales to network engineering to customer support — are all living and working in the communities they serve.

Specifications

- Round-the-clock technical support available 24/7/365.
- Automated daily status reports and access to an online management portal.
- Custom retention policies ranging from thirty days to multi-year archives.
